SIZE GUIDE

## MEASUREMENT GUIDELINES

Please note that every manufacturer has their own sizes - We recommend using the below guidelines as a starting point in order to achieve the best sizing results.

For all garments we recommend measuring a similar garment you already own that fits well and then comparing those measurements to the attached size charts - this should reduce any risk of choosing the incorrect sizing.

Please note that some measurements given are 1/2 measurements, so you will need to divide full measurements in half.

**1/2 Chest:** We recommend taking an existing top that you know fits well and taking a straight line measurement across the chest, approximately 1cm below the armpit. Then use the charts below to obtain which size you are in Tribal.

**HSP Length:** We recommend taking the measurements from a garment you already own, otherwise measure in a straight line from the top of the shoulder point to the bottom of the garment.

**CB Length:** We recommend taking the measurements from a garment you already own, otherwise measure in a straight line in the center back of the garment from below the collar to the hem.

**1/2 Waist:** We recommend taking an existing short or pant that you know fits well and taking a straight line measurement across the top of the waistband from one side to the other. Then use the charts below to obtain which size you are in Tribal.

**Length/outseam:** We recommend taking the measurements from a garment you already own, otherwise measure in a straight line from the top of the waistband down the side of the short to the hem [outseam].

Tribal Sport also have size samples in all the products listed in this catalogue should you require actual samples to try on, we recommend using the size samples when possible.

# SIZING GUIDE

## MEASUREMENT GUIDELINES

We recommend taking all measurement from existing garments that you know fit well and comparing those measurements to the tables below to find your Tribal size.

1/2 Chest: We recommend taking an existing top that you know fits well and taking a straight line measurement across the chest, approximately 1cm below the armpit. Then use the charts below to obtain which size you are in Tribal.

Length: We recommend taking the measurements from a garment you already own, otherwise measure in a straight line from the bottom of the collar point to the bottom of the garment on the centre back panel.

1/2 Waist: We recommend taking an existing short or pant that you know fits well and taking a straight line measurement across the top of the waistband from one side to the other.  
Then use the charts below to obtain which size you are in Tribal.

Length: We recommend taking the measurements from a garment you already own, otherwise measure in a straight line from the top of the waistband down the side of the short to the hem [outseam].

### BASKETBALL APEX/CORE SHORT - BOYS/MEN
